- *CSSDS *CTDS
- *CMSS *CCVP

The idea of a fully converged enhanced communications service provider was first developed in 1994, when the founder, **Arthur Henley**, organized OfficeComm Inc. to build and manufacture integrated packet voice over data network products. Mr. Henley and his associate were granted U.S. Patent Number 5,526,353 for transmitting packetized voice over data networks in 1996.

Meriplex was founded and built upon this experience to implement revolutionary VoIP technology into turn-key solutions and services for the enterprise market.

Whether it is a new business with a handful of employees or a large enterprise with thousands of employees, Meriplex Communications will build a solution that compliments every company's local and long distance calling needs.

Meriplex Communications is a Texas based enhanced service provider specializing in communication solutions for the enterprise market with its Headquarters located in Houston, Texas.

Meriplex has an exclusive division that specializes in the infrastructure and communication needs of the Oil, Gas & Chemical providers and suppliers supporting the energy sector. By the experience this team has acquired Meriplex is the obvious choice for energy and chemical companies that require IP Telephony, Security and Wireless applications worldwide.

Meriplex also focuses on converged, Internet Protocol (IP) based service bundles encompassing the whole scope of communication needs. These include local and long distance voice utilizing Voice over Internet Protocol (VoIP), fiber optic, T1 and MPLS broadband data access with guaranteed quality of service (QoS), virtual private networks (VPN), IT consulting services, and data/voice network cabling.

Meriplex's combination of Cisco hardware, managed T1 circuits and fiber optics enables businesses to converge data and voice on a single high-speed network. We offer solutions that are specifically built for your enterprise's voice and high-speed data needs.

Meriplex Communications provides the customer service, security, reliability and knowledge every company demands.

Every new company that Meriplex brings into its family attends both pre and post installation meetings to ensure the full understanding in each step of the installation and cut over process. We ensure a smooth transition by first documenting the entire process and finally checking every facet including clarity, reliability, and the specific features ordered.
